Verifiable Credentials Wallets in a Skills-First Talent Marketplace

Digital Wallet Design and Discovery Workshop

Jobs for the Future

THE VERIFIABLE CREDENTIALS PROJECT

"What's one unique skill or talent you have that wouldn't be obvious from your LinkedIn profile?"

INTRO DUCTIONS

JFF

OUR NORTH STAR

In 10 years, ***75 million*** people facing systemic barriers to advancement, work in quality jobs.

77% of digital credential users say communicating their skills to prospective employers was easy

58% of jobseekers would likely use a digital wallet in their job application process, even if not required by employer

Verifiable Credentials are an open standard developed by the World Wide Web Consortium (W3C), the organization responsible for standardizing Web technologies

W3C Verifiable Credentials

When digital records (credentials) are issued in the Verifiable Credentials (VC) format, they are tamper-evident and cryptographically signed. This makes them different from other digital documents because they enable verification that a credential is **authentic**, **unaltered**, **valid**, even if the institution no longer exists.

They can also hold rich data about skills, protect privacy, enable agency, and are the foundation of true portability and interoperability

1edtech Open Badges v3.0 (OBv3) build upon the W3C VC standard with the purpose of proving claims made about educational achievements

Do you accept this credential?

Is this credential authentic, unaltered, valid?

Where would you like to put this credential?

Will you share it with me?

LCW Experience Badge

Kerri Lemoie, this is where you can claim your LCW Experience Badge. Here's how it works:

1. If you haven't installed the Learner Credential Wallet yet, **install on your mobile device**, follow set-up instructions in the app and return here for next steps.

2. If you are viewing this page on your phone then click here to add your credential to the Learner Credential Wallet:

Add to LCW

If you are viewing this page on a computer screen, scan this QR from your phone camera:

Issuer

- ✓ Has been issued by a registered institution:
  - DCC Sandbox Registry

Credential

- ✓ Has a valid digital signature
- ✓ Has not expired

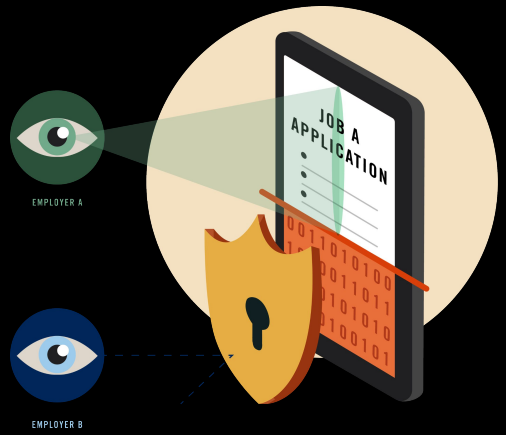
WALLET SELECTION

Lifelong Learning

Standards conformance is insufficient, so we should continue to demonstrate portability and interoperability of credentials.

Individual Agency and Control

We should continue to prioritize choice and develop more ways for people to decide when, how, and with whom to share their data.



Privacy, Individual Rights, and Civil Liberties

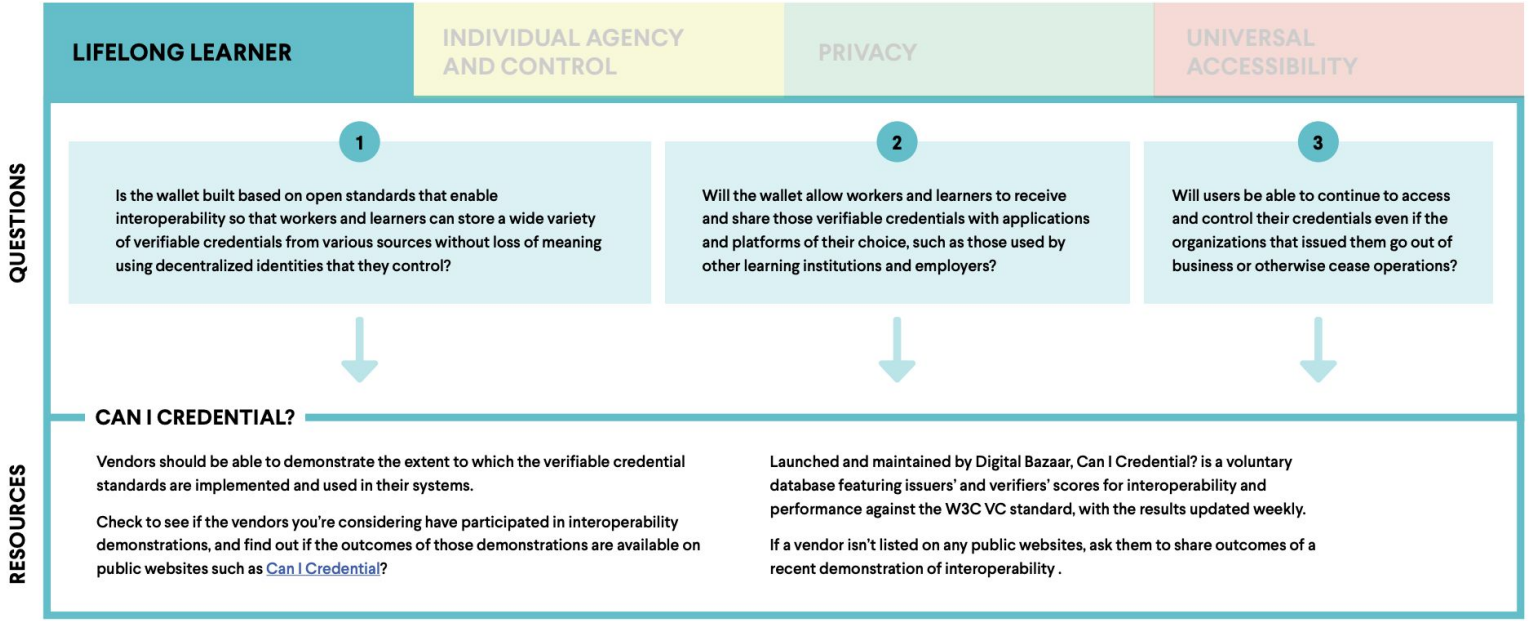
Data privacy and access are not at odds when we prioritize privacy, safety, and civil liberties.

Universal Accessibility

Digital tools enable greater participation in digital democracies when we build them to be accessed by anyone, regardless of resources.

A Vendor Selection Toolkit

Here's a list of questions to ask and a list of resources that can help you choose a digital wallet vendor. The questions are grouped into categories based on the four opportunities for impact identified in the 2022 JFF market scan report *Building a Skills-Based Talent Marketplace*.



Thank you!
